

Precision Pure PWS 8-5 & 5-3

Automatic Counter Top Distillers

For automatic family size convenience, the Precision Pure 8.5 & 5.3

Distiller's, hands-off, fully automatic operation is designed with the busy customer in mind. These automatic distillers allows you to go about your busy day, with the secure feeling that when you need it, the purest steam distilled drinking water is available at your fingertips, without the extra work and inconvenience of handling bottles. The outstanding features of this advanced design include: being constructed with high quality, easy to clean, mirror finish stainless steel; a user-friendly, easy to change and long lasting charcoal filter; and a 3/4" impurities drain system*.

Combine these outstanding features with the optional pump kit and automatic drain, and your busy schedule will just have become easier.

*3/4" drain not available on model 5-3.

Note Model 5-3 is not designed to be equipped with optional pump kit or automatic auto drain. These distillers have all the quality featured on all Precision Water Distillers.

PWS 8.5 SPECIFICATIONS

Height	23"	58.4cm	Depth	12"	30.5cm
Width	17.5"	44.5cm	Weight	39lb	17.7kg

Volts	Amps	Hertz	Watts
120v	9.2	60	1100
220v	5.0	50/60	1100

PWS 5.3 SPECIFICATIONS

Height	17"	43.2cm	Depth	12 7/8"	32.7cm
Width	19"	48.3cm	Weight	32lb	14.5kg

Volts	Amps	Hertz	Watts
120v	6.8	60	800
220v	3.4	50/60	800

PRECISION Water Systems

The Precision Pure PWS 8-5 & 5.3 Water Distillers are a result of over 25 years of distillation manufacturing experience. Its features and benefits provide the very best water system for steam distilled drinking water requirements. The Precision Pure PWS 8-5 & 5.3 provide safe pure water at home for a fraction of the cost of bottled water.

The Precision Pure PWS 8-5 & 5.3 Water Distillers duplicate nature's own method of purifying water. This highly reliable process for purifying water combines distillation with a high capacity activated carbon filter providing clean, great tasting water.

Your Precision Pure PWS 8-5 & 5.3 are the most advanced water distillers on the market today. They are designed with many user-friendly features:

1. Your water distiller is connected to your household water supply. The raw water feeds into the distiller through a 1/4" water line (1). This line is connected to a quick connect plumbing fitting. As the raw water enters the distiller it passes through a long life stainless steel sealed solenoid and then directly into the boiler chamber (2).
2. After the water reaches a level over the heating element (3), the distiller starts the heating cycle and brings the water to boil. The pure steam (4) rises and enters the baffle system (5), which breaks down any foaming in the boiler should it occur.
3. Any volatile gases are released through a special gas release vent at the highest point in the cooler system (6). The pure steam passes through the condenser coil (7). To support the cooling cycle a fan is used to properly cool the steam (8).
4. Pure water enters the stainless steel charcoal filter (9). This filter is 2/3 filled with activated coconut charcoal, which should be changed semi annually.
5. Finally distilled water leaves the charcoal filter and runs into the high capacity stainless steel storage tank (10).
6. As the distilled water enters the storage tank, the water level lifts the pump control switch and activates the optional pump (11) to deliver distilled water to any combination of accessory faucet, ice maker or humidifier.
7. The distiller will continue to run until the water reaches the top of the storage tank and lifts the upper float (12) and turns itself off. As soon as the distiller shuts off, the automatic electric drain valve system (15) if equipped, automatically drains the impurities. As soon as you have used approximately 1/3 of the capacity of the tank the stainless steel stem float (13) will turn on the distiller and close the automatic drain valve (15). In order to fill the boiling tank and start the distilling cycle again.
8. The demand pump system (11), if equipped, connects to the bottom of the storage tank and electrically plugs into the bottom of the distiller head (16). The pump is protected by a built in fuse and a low level shut off float (14).

Model 5-3 is not designed to be equipped with Options 11, 13, 14, 15, 16

Precision Pure 8-5 & 5.3 Water Distiller

AUTOMATIC FAMILY SIZE CONVENIENCE

Not exactly as illustrated.
Model PWS 8-5 and 5-3 features are similar.

Model 8-5

Distilling Capacity: 8.0 US gal. (30.0 L)/24 hrs*
Holding Tank Capacity: 4.0 US gal. (15.2 L)
Shipping Weight: 39.0 lbs. (17.7 kg)

Model 5-3

Distilling Capacity: 5.0 US gal. (18.9 L)/24 hrs*
Holding Tank Capacity: 3.0 US gal. (11.3 L)
Shipping Weight: 36 lbs. (13.7 kg)

FOR MORE INFORMATION ABOUT OUR PRODUCT LINE, OPTIONAL FEATURES AND OUR EXCELLENT WARRANTY, CONTACT YOUR PRECISION WATER SYSTEMS REPRESENTATIVE

FEATURES AND BENEFITS

-  Trouble free float system
-  Seal protected switching
-  Highly efficient, stainless steel finned coil
-  Advanced, worry free stainless steel water solenoid fill valve
-  Large 5" boiling and storage tank opening
-  3/4" drain for easy flushing
-  Charcoal filter – replaceable semi annually
-  Warranty • 2 year parts
• 15 year pro rated on stainless steel
